

Rakshaa Viswanathan

Software Engineer | Distributed Systems | Cloud Infrastructure

Phone: +91-7598600169 | Email: hi@rakshaa.dev | LinkedIn | Portfolio | Bengaluru, India

PROFESSIONAL SUMMARY

Software Engineer specializing in distributed systems, cloud infrastructure, and developer platforms at Microsoft, delivering production systems supporting 10k+ services and 100k+ servers across sovereign cloud environments.

EXPERIENCE

Microsoft

Software Engineer, Azure Edge & Platform

Bengaluru, India

06/2022 – Present

- Architected and implemented backend resolvers and data pipelines of **Azure Dependency Service Graph**, an internal tool to map build and runtime service dependencies for new sovereign clouds, using **GraphQL**, **Cosmos DB**, and **Kusto** for **10k+ services**, reducing **incident resolution time by 30%**.
- Designed and implemented an event-driven configuration architecture for **Cloud-Sprout**, an internal configuration management tool, using **Kafka** and **Azure PubSub**, **reducing propagation latency by 70%** and scaling to **2M+ of events daily**.
- Engineered Cloud-Sprout API modernisation across schema versioning, caching, and performance optimisation, **reducing onboarding time by 25%** and **improving P99 request latency** across sovereign environments **by 30%**.
- Owned design and deployment of **Cloud-Sprout AI Assistant** using **RAG** and **Azure semantic search**, automating support for **10k+ configurations** and reducing engineering support overhead.
- Owned integration of **Linux Integration Services Automation (LISA)** into Azure Linux, standardizing validation workflows, accelerating release cycles, and improving reliability across large-scale production server environments, bringing the **shipping time down from 14 days to 7 days**.
- Engineered automated validation and release pipelines using **Linux**, **Python**, **React**, and **JavaScript**, **reducing regression defects by 35%** and **accelerating deployments by 20%**.

Microsoft

Software Engineering Intern

Bengaluru, India

06/2021 – 07/2021

- Engineered and optimized a **distributed build system** using **Go** and **Linux** virtualization, improving parallel compilation efficiency, **reducing build time by 66%**, and strengthening fault recovery for large-scale kernel workloads.

EDUCATION

National Institute of Technology, Tiruchirappalli

B.Tech, Electrical & Electronics Engineering — Minor in Computer Science & Engineering

2018 – 2022

CGPA: 8.51/10

LEADERSHIP

- **Founded Superposition Chennai**, scaling a technical developer community to 300+ engineers through workshops, mentorship programs, and hands-on sessions across cloud, AI, and software engineering.
- **Directed Kurinji Hacks**, leading technical mentorship for 500+ developers across backend engineering, distributed systems, and machine learning project tracks.
- **Mentored early-career developers** through global technical communities, supporting students and women in engineering through hackathons, career coaching, and open-source initiatives.

SKILLS

Languages: C++, C, Java, Python, C#, Go, JavaScript, Bash, YAML

Distributed Systems: Microservices, Event-Driven Architecture, REST, GraphQL, gRPC, API Design

Cloud & Infrastructure: Microsoft Azure, Docker, Kubernetes, Terraform, Git, Linux

Data: SQL, NoSQL, Cosmos DB, Distributed Databases, Caching, Message Queues, Kafka, Pub/Sub

Systems: Networking, Multithreading, Concurrency
